Protecting the health, beauty, and well-being of Otsego Lake.

Scientific Monitoring

Invasive Species

STOP AQUATIC HITCHHIKERS!

Aquatic Invasive Species (AIS), such as Eurasian watermilfoil, Asian clams, and zebra mussels, can be spread between waterbodies on boating and fishing equipment that has not been cleaned, drained, and dried. Help protect Otsego Lake by following these guidelines:

CLEAN	DRAIN	DRY
<p>AFTER BOATING, BEFORE YOU LEAVE THE LAUNDRY:</p> <p>Remove all visible plants, animals, fish, and mud from your boat, trailer, or other equipment and dispose of it in a suitable trash container or on dry land.</p>	<p>AFTER BOATING, BEFORE YOU LEAVE THE LAUNDRY:</p> <p>Drain water from bilge, live wells, bait buckets, and any other containers with water before leaving the launch.</p>	<p>BEFORE YOU ARRIVE AT THE LAUNCH TO GO BOATING:</p> <p>Dry your boat, trailer, and all equipment completely. Drying times vary depending on the weather and the type of material. At least four days of drying time is generally recommended during the summer.</p>

Water – the Gift of Life

The lake assumes and hides great water of the Otsego Lake region are natural resources for us to protect and enjoy. We cannot afford to wait for a disaster before we act.

Attracting tourists and supplying abundant water to support thriving communities. The region's economy is dependent on high-quality water. High-quality water is essential for the health and well-being of the Otsego Lake watershed. When water is clean, healthy and beautiful, it is a valuable resource. It is a source of pride and a source of life. It is a source of water for the lake, the land, and the air. It is a source of water for the lake, the land, and the air. It is a source of water for the lake, the land, and the air.
